How Green Acres Works

The assessor determines two values on Green Acres property:

1. The "estimated market value" based on sales of similar property taking into consideration all of the non-farm factors that influence its market value.
2. The "agricultural value" or "Green Acres value" based on sales of agricultural property in areas not affected by development pressures.

Taxes are calculated on both market values, but paid on the lower, agricultural value each year. The difference between the tax calculated on agricultural market value and the actual market value is deferred until the property is sold or no longer qualifies for the Green Acres program.

The deferred tax (the difference between the agricultural tax and the tax based on the highest and best use) is a lien upon the property assessed to the same extent and for the same duration as other taxes imposed upon property in the state. The tax is annually extended by the county auditor and if and when payable shall be collected and distributed in the manner provided by law for the collection and distribution of other property taxes.

How to Apply

Complete application and attach a required "Green Acres Addendum Form" for each parcel you wish to enroll. Green Acres applications are made to and approved by the county assessor where the property is located. Application forms must be filed by May 1 in order to receive consideration for the following taxes payable year.

If you are granted deferment through this program, you will not be required to file this application each year. However, the county assessor may require you to provide an additional application or other proof deemed necessary to verify that you continue to qualify for the Green Acres deferment.

Required Attachments

You must attach all your Green Acres Addendum Forms to this form before submitting it to the assessor.
