

The Water Treatment Facility is staffed 24/7/365. For inquires or construction-related emergencies, please call (320) 255-7225.

CONSTRUCTION PROGRESS

The contractor has started excavation on the south side of the Water Treatment Facility. There are large conduits that power the onsite generator. Those conduits will be moved to facility the new liquid oxygen tanks.

FAQs

A construction website was created. The website has additional project information. Please use this link. <https://ci.stcloud.mn.us/WaterProject>

The Webcam link is also on the Construction Website. Please click on that link for a live look at the construction project.

How will you secure the construction site?

Maintaining a safe and secure construction site is extremely important, especially while working in a City park. Fencing will be installed between the Water Treatment Facility and Hester Park to protect residents and visitors from the construction site and prevent accidents.

Inside, the contractor has started demolition by removing a tank. The operating and maintenance levels are being demo'd as well. They have constructed a temporary laboratory in the chemical unloading garage. Pictured is installing baffle walls in the clearwell storage tank.
