

Water Treatment Facility Advanced Process Improvement December 2021

*The Water Treatment Facility is staffed 24/7/365. For inquires or construction-related emergencies, please call (320) 255-7225.*

## CONSTRUCTION PROGRESS

The final treatment process and piping is being installed. There was 360 feet of 48-inch pipe and two ultraviolet reactors installed in an old tank that held 1.0 million gallons of water. The transition of treatment disinfection will allow for less chlorine to be fed into the water treatment system.

## FAQs

A construction website was created. The website has additional project information. Please use the below link.

<https://ci.stcloud.mn.us/WaterProject>

The Webcam link is also on the Construction Website. Please click on that link for a live look at the construction project.
