

Water Treatment Facility Advanced Process Improvement February 2022

The Water Treatment Facility is staffed 24/7/365. For inquires or construction-related emergencies, please call (320) 255-7225.

CONSTRUCTION PROGRESS

Solar conduit and wires were relocated. The solar panels are producing renewable energy again, and are able to supply energy to the Treatment Facility.

A Water Treatment Facility shut down was required to remove sections of piping, which included a 48" and 36", and to place blind flanges back on to the existing piping. This is to eliminate flow through for a former tank that now holds equipment.

FAQs

A construction website was created. The website has additional project information. Please use this link. <https://ci.stcloud.mn.us/WaterProject>

The Webcam link is also on the Construction Website. Please click on that link for a live look at the construction project.
