

ST. CLOUD POLICE DEPARTMENT
Law Enforcement
Policies and Procedures

Subject: Eyewitness Identification	Policy Number: 247
Issue Date: 01-28-2021	Revision Date:
Approval Authority - Title and Signature: Wm. Blair Anderson, Chief of Police	

POLICY

Officers shall adhere to the procedures for conducting eyewitness identifications set forth in this policy, to maximize the reliability of identifications, minimize erroneous identifications, and gather evidence that conforms to contemporary eyewitness identification protocols. An officer administering a live or photographic lineup should be unaware of the suspect's identity. If that is not practical, the administrator should use a photographic lineup process that prevents the administrator from seeing which member of the photographic lineup is being viewed by the eyewitness at a given time (blinded administration).

PURPOSE

It is the purpose of this policy to establish guidelines for eyewitness identification procedures involving show-ups, photo arrays, and lineups. Erroneous eyewitness identifications have been cited as the factor most frequently associated with wrongful convictions. Therefore, in addition to eyewitness identification, all appropriate investigative steps and methods should be employed to uncover evidence that either supports or eliminates the suspect identification.

DEFINITIONS

Show-up: The presentation of a suspect to an eyewitness within a short time frame following the commission of a crime to either confirm or eliminate him or her as a possible perpetrator. Show-ups, sometimes referred to as field identifications, are conducted in a contemporaneous time frame and proximity to the crime.

Lineup: The process of presenting live individuals to an eyewitness for the purpose of identifying or eliminating suspects.

Photo Array: A means of presenting photographs to an eyewitness for the purpose of identifying or eliminating suspects.

Administrator: The law enforcement official conducting the identification procedure.

Blind Presentation: The administrator does not know the identity of the suspect.

Blinded Presentation: The administrator may know the identity of the suspect but does not know which photo is being viewed by the eyewitness at any given time.

Confidence Statement: A statement in the witness' own words taken immediately after an identification is made stating his or her level of certainty in the identification.

Filler: A live person, or a photograph of a person, included in an identification procedure who is not considered a suspect.

Sequential: Presentation of a series of photographs or individuals to a witness one at a time.

Simultaneous: Presentation of a series of photographs or individuals to a witness all at once.

PROCEDURE

1. Show-ups

The use of show-ups should be avoided whenever possible in preference to the use of a lineup or photo array procedure. However, when circumstances require the prompt presentation of a suspect to a witness, the following guidelines shall be followed to minimize potential suggestiveness and increase reliability.

- a. Document the witness' description of the perpetrator prior to conducting the show-up.
- b. Conduct a show-up only when the suspect is detained within a reasonable time frame after the commission of the offense and within a close physical proximity to the location of the crime.
- c. If probable cause to arrest the suspect has already been established by other means, consider using a lineup or photo array instead of a show-up if needed.
- d. Whenever feasible, the witness should be brought to the suspect's location for the show-up.
- e. If possible, avoid conducting a show-up when the suspect is in a patrol car, handcuffed, or physically restrained by officers, unless safety concerns make this impractical.
- f. Caution the witness that the person he or she is about to see may or may not be the perpetrator—and it is equally important to clear an innocent person. The witness should also be advised that the investigation will continue regardless of the outcome of the show-up.
- g. Do not conduct the show-up with more than one witness present at a time.
- h. Separate witnesses and do not allow communication between them before or after conducting a show-up.
- i. Do not present the same suspect to the same witness more than once.
- j. Do not require show-up suspects to put on clothing worn by, speak words uttered by, or perform other actions of the perpetrator.
- k. Officers should scrupulously avoid words or conduct of any type that may suggest to the witness that the individual is or may be the perpetrator.
- l. Ask the witness to provide a confidence statement in their own words.
- m. Remind the witness not to talk about the show-up to other witnesses until police or prosecutors deem it permissible.

- n. Videotape the identification process using an in-car camera or other recording device when feasible.
- o. Document the time and location of the show-up, the officers present, the result of the procedure, and any other relevant information.

2. Basic Procedures for Conducting a Lineup or Photo Array

- a. Lineups will not typically be utilized for investigations, unless conducting a photo array is not possible.
- b. An officer administering a live or photographic lineup should be unaware of the suspect's identity (blind presentation). If that is not practical, the administrator should use a photographic lineup process that prevents the administrator from seeing which member of the photographic lineup is being viewed by the eyewitness at a given time (blinded presentation).
- c. The lineup or photo array should consist of a minimum of six individuals or photographs. Use a minimum of five fillers and only one suspect.
- d. Fillers should be reasonably similar in age, height, weight, and general appearance and be of the same sex and race, in accordance with the witness' description of the offender.
- e. Avoid the use of fillers who so closely resemble the suspect that a person familiar with the suspect might find it difficult to distinguish the suspect from the fillers.
- f. Create a consistent appearance between the suspect and the fillers with respect to any unique or unusual feature (e.g., scars, tattoos, facial hair) used to describe the perpetrator by using fillers with similar features to the extent possible.
- g. If there is more than one suspect, include only one in each lineup or photo array.
- h. During a blind presentation, no one who is aware of the suspect's identity should be present during the administration of the photo array. However, during a lineup, the suspect's attorney should be present.
- i. Place suspects in different positions in each lineup or photo array, both across cases and with multiple witnesses in the same case.
- j. Witnesses should not be permitted to see or be shown any photos of the suspect prior to the lineup or photo array.
- k. The witness shall be given a copy of the following instructions prior to viewing the lineup or photo array and the administrator shall read the instructions aloud before the identification procedure.

You will be asked to look at a series of individuals.

The perpetrator may or may not be present in the identification procedure.

It is just as important to clear innocent persons from suspicion as it is to identify guilty parties.

(Read only if you are administering this line up for another officer) I don't know whether the person being investigated is included in this series.

Sometimes a person may look different in a photograph than in real life because of different hairstyles, facial hair, glasses, a hat or other changes in appearance. Keep in mind that how a photograph was taken or developed may make a person's complexion look lighter or darker than in real life.

You should not feel that you must make an identification. If you do identify someone, I will ask you to describe in your own words how certain you are.

The individuals are not configured in any particular order.

If you make an identification, I will continue to show you the remaining individuals or photos in the series.

Regardless of whether you make an identification, we will continue to investigate the incident.

Since this is an ongoing investigation, you should not discuss the identification procedures or results.

- l. The lineup or photo array should be shown to only one witness at a time; officers should separate witnesses, so they will not be aware of the responses of other witnesses.
- m. Multiple identification procedures should not be conducted in which the same witness views the same suspect more than once.
- n. Officers should scrupulously avoid the use of statements, cues, casual comments, or providing unnecessary or irrelevant information that in any manner may influence the witness' decision-making process or perception.
- o. Following an identification, the administrator shall ask the witness to provide a confidence statement in their own words and document the witness's response.
- p. The administrator shall ask the witness to complete and sign an Eyewitness Identification Procedure Form.
- q. Lineup and photo array procedures should be video- or audio-recorded whenever possible. If a procedure is not recorded, a written record shall be created and the reason for not recording shall be documented. In the case of lineups that are not recorded, officers shall take and preserve a still photograph of each individual in the lineup. In the case of a photo lineup, a copy of the photo lineup should be placed into evidence. A document identifying all photos in the lineup should be created and placed into evidence as well.

3. Photographic Arrays

a. Creating a Photo Array

1. Use contemporary photos.
2. Do not mix color and black and white photos.
3. Use photos of the same size and basic composition.
4. Never mix mug shots with other photos and ensure consistent appearance of photograph backgrounds and sizing.
5. Do not include more than one photo of the same suspect.
6. Cover any portions of mug shots or other photos that provide identifying information on the subject – and similarly cover other photos used in the array.
7. Where the suspect has a unique feature, such as a scar, tattoo, or mole or distinctive clothing that would make him or her stand out in the photo array, filler photographs should include that unique feature by selecting fillers who have the same features themselves to the extent possible.
8. Fillers should not be reused in arrays for different suspects shown to the same witness.

b. Conducting the Photo Array

1. The photo array should be preserved, together with full information about the identification process as part of the case file and documented in a report.
2. If a blind administrator is not available, the administrator shall ensure that a blinded presentation is conducted using the following procedures.
 - a. Place the suspect and at least five filler photos in separate folders for a total of six or more depending on the number of fillers used).
 - b. The administrator will take one folder containing a known filler and place it to the side. This will be the first photo in the series. The administrator should then shuffle the remaining folders (containing one suspect and the remainder of fillers) such that he or she cannot see how the lineup members are ordered. These shuffled folders will follow the first filler photo. The stack of photos is now ready to be shown to the witness.
 - c. The administrator should position himself or herself so that he or she cannot see inside the folders as they are viewed by the witness.
3. The witness should be asked if he or she recognizes the person in the photo before moving onto the next photo. If an identification is made before all of the photos are shown, the administrator should tell the witness that he or she must show the witness all of the photos and finish showing the sequence to the witness, still asking after each photo if the witness recognizes the person in the photo.
4. If possible, the array should be shown to the witness only once. If, upon viewing the entire array, the witness asks to see a particular photo or the entire array again, the witness should be instructed that he or she may view the entire array only one additional time. If a second viewing is permitted, it must be documented.

4. Lineups

a. Conducting the Lineup

1. Live lineups shall be conducted using a blind administrator.
 2. Ensure that all persons in the lineup are numbered consecutively and are referred to only by number.
- b. The primary investigating officer is responsible for the following:
1. Scheduling the lineup on a date and at a time that is convenient for all concerned parties, to include the prosecuting attorney, defense counsel, and any witnesses.
 2. Ensuring compliance with any legal requirements for transfer of the subject to the lineup location if he or she is incarcerated at a detention center.
 3. Making arrangements to have persons act as fillers.
 4. Ensuring that the suspect's right to counsel is scrupulously honored and that he or she is provided with counsel if requested. Obtaining proper documentation of any waiver of the suspect's right to counsel.
 5. Allowing counsel representing the suspect sufficient time to confer with his or her client prior to the lineup and to observe the manner in which the lineup is conducted.
